

The Water Bottle Dilemma

Why water bottles are causing problems...

Like all plastic, these bottles will be with us forever since plastic does not biodegrade; rather, it breaks down into smaller and smaller toxic bits that contaminate our soil and waterways.

About 40 million water bottles are thrown away daily, adding to landfill waste. 1.5 million barrels of oil is used annually to produce plastic water bottles for America alone - enough to fuel some 100,000 U.S. cars for a year.

Water we to do?

- Use a refillable water bottle instead of buying water and throwing away the plastic water bottles.
- 

\$2 Tap Water?

According to the National Resources Defense Council tap water is just as safe as bottled water. Many brands of bottled water including Aquafina and Dasani come from municipal water supplies.
